Format

Definitions - Odds and Probabilities

There are 3 methods of stating odds that most bookmakers and websites support.

Implied Probability is also useful when evaluating a bet or checking how likely an outcome is.

Fractions Used primarily in the UK and

Ireland, fractions quote the potential profit should the bet succeed relative to the stake. For example, if £5 is bet at odds of 2/1 the potential profit is £10 (£5 \* 2) and the total returned is £15 (£10 plus the £5 stake). Decimals quote the potential return should the bet succeed relative to the stake. For example, if £5 is bet at odds of 3 the total returned is £15 (£5 \* 3) the potential profit is £10 (£5 \* 3 minus the £5 stake). American - Moneyline Positive figures: The odds state the winnings on a £100 bet e.g. american odds of 110 would win £110 on a £100 bet.

Negative figures:

The odds state how much must be bet to win £100 profit e.g. american odds of -120 would win £100 on a £120 bet. Implied Probability Odds correlate to probability e.g. a 3/1 bet is expected to win one in every 4 attempts. Hence the probability is 25%.

How to

Convert Odds and Probabilities - FAQ

How do you convert odds to probability

percentages? Decimal - 1 divided by the decimal odds, multiplied by 100 to give a percentage e.g. decimal odds of 2 =  $(1/2) * 100 = 50\%$ .

- 1 divided by the decimal odds,

multiplied by 100 to give a percentage e.g. decimal odds of 2 =  $(1/2) * 100 = 50\%$ .

Fraction - 1 divided by (the fractional odds plus 1), multiplied by 100 to give a percentage. e.g. fractional odds of 3/1 =  $(1 / ((3/1) + 1)) * 100 = 25\%$ .

- 1 divided by

(the fractional odds plus 1), multiplied by 100 to give a percentage. e.g. fractional odds of 3/1 =  $(1 / ((3/1) + 1)) * 100 = 25\%$ . American: Positive odds - 100 divided by (the american odds plus 100), multiplied by 100 to give a percentage e.g. american odds of 150 =  $(100 / (150 + 100)) * 100 = 40\%$ . Negative odds - Firstly multiply the american odds by -1 and use the positive value in the following formula: american odds divided by (the american odds plus 100), multiplied by 100 to give a percentage e.g. american odds of -300 =  $(300/(300+100)) * 100 = 75\%$ .

How do you convert probability percentages

to odds? Decimal - 1 divided by (the percentage divided by 100) e.g. a probability of 50% =  $1 / (50 / 100) = 2$ .

- 1 divided by (the percentage divided by 100) e.g. a

probability of 50% =  $1 / (50 / 100) = 2$ . Fraction - (1 divided by (the percentage divided by 100)) minus 1 e.g. a probability of 25% =  $(1 / (25 / 100)) - 1 = 3 = 3/1$ .

-

(1 divided by (the percentage divided by 100)) minus 1 e.g. a probability of 25% =  $(1 / (25 / 100)) - 1 = 3 = 3/1$ . American: Positive odds - (100 divided by (the percentage divided by 100)) minus 100 e.g. a probability of 10% =  $(100 / (10 / 100)) - 100 = 900$ .

Negative odds - The probability divided by (1 minus (the probability divided by 100)) then multiply by -1 to convert into a negative e.g. a probability of 60% =  $(60 / (1 - (60/100))) * -1 = -150$ .

How do you convert american odds to decimal? Positive odds - 1

plus (the american odds divided by 100) e.g. american odds of 300 =  $1 + (300/100) = 4$ .

- 1 plus (the american odds divided by 100) e.g. american odds of 300 =  $1 +$

$(300/100) = 4$ . Negative odds - 1 minus (100 divided by the american odds) e.g. american odds of -300 =  $1 - (100/-300) = 1.333$ . How do you convert american odds to fractional?

Positive odds - The american odds divided by 100 e.g. american odds of 300 =  $300/100 = 3/1$ .

- The american odds divided by 100 e.g. american odds of 300 =  $300/100 = 3/1$ .

Negative odds - Minus 100 divided by the american odds e.g. american odds of -300 =  $-100/-300 = 1/3$ . How do you convert fractional odds to decimal? Add 1 to the fractional representation e.g. a fractional value of  $3/1 = (3/1) + 1 = 4$ . How do you convert fractional odds to american? Positive american odds - The fractional value multiplied by 100 e.g. a fractional odds of  $3/1 = (3/1) * 100 = 300$ .

- The fractional value

multiplied by 100 e.g. a fractional odds of  $3/1 = (3/1) * 100 = 300$ . Negative american

odds - Negative 100 divided by the fractional odds e.g. a fractional value of  $1/5 =$

$-100 / (1/5) = -500$ . How do you convert decimal odds to fractional? Subtract 1 from the decimal representation e.g. a decimal value of  $3 = 3 - 1 = 2$  which is commonly

expressed as  $2/1$ . How do you convert decimal odds to american? Positive american odds - (The decimal value minus one) multiplied by 100 e.g. a decimal value of  $3 = (3 - 1) * 100 = 200$ .

- (The decimal value minus one) multiplied by 100 e.g. a decimal value of  $3$

$= (3 - 1) * 100 = 200$ . Negative american odds - Negative 100 divided by (the decimal odds minus one) e.g. a decimal value of  $1.2 = -100 / (1.2 - 1) = -500$ .

### Aspectos importantes a considerar en las negociaciones de paz en Gaza

Las últimas vueltas y revueltas en las negociaciones para poner fin a la guerra en Gaza pueden parecer laberínticas y confusas. Pero en realidad no es tan complicado. Benjamin Netanyahu, primer ministro de Israel, debe comprometerse en los detalles pendientes del propuesto acuerdo de alto el fuego y la contraoferta de Hamas del fin de semana – e inmediatamente detener los

bombardeos criminales de Gaza e incursiones militares irresponsables en áreas pobladas de refugiados cerca de Rafah.

Por su parte, Hamas debe honrar los acuerdos anteriores sobre el lanzamiento escalonado de rehenes israelíes y dejar de subastar a última hora, especialmente sobre cuántos detenidos palestinos, y cuáles, son liberados a cambio.

## **La posición de Netanyahu**

La posición de Netanyahu, adoptada inmediatamente después de las masacres de octubre de civiles israelíes, de que la única medida real del éxito es la destrucción completa y total de Hamas, es el mayor obstáculo para la paz.

## **El objetivo de Hamas**

Las demandas de Hamas de que Israel esté de acuerdo con un "final permanente" de la guerra en este momento siempre fueron irrealistas.

## **Obstáculos para la paz**

El corazón de la disputa ha girado durante meses en torno a una sola pregunta. Hamas exige que cualquier acuerdo incluya el final de la guerra y una retirada completa de las tropas israelíes de la Franja de Gaza, con garantías ... Netanyahu se niega a estar de acuerdo con esto, porque significaría admitir su fracaso en alcanzar los objetivos declarados de la guerra e incluso podría abrir una colmena de avispones políticos.

## **El temor de Netanyahu**

El problema clave, como ven muchos israelíes y diplomáticos extranjeros, es que la guerra en curso es realmente la opción preferida de Netanyahu.
