The truth is that there is no trick to slot machines. They provide random results based on set mechanics and it all comes down to luck. With that being said, not all games are the same, so picking the right options is key, and you can still change the size of the bet throughout the session for better results.

[bet pix 365 download](#)

Modern gaming machines use computer technology to operate their functions. Slot machine outcomes are determined using a Random Number Generator (RNG) which is a mathematically-based program that selects groups of numbers to determine which symbols are selected to produce a winning or losing outcome.

Timing Is Everything

Understanding when to get aggressive and when to let go is fundamental to this style of play. Let's look at two examples that illustrate the difference.

Example Hand 2

You are playing against loose, but not stupid, players and your table image – for the ones that have been paying attention – is pretty good. You haven't pulled off any obscene bluffs and you don't think anyone has any particular reason to believe you're betting with air.

You are holding J-J and your preflop raise gets three callers, with the board falling A-9-6. You figure that there was a good chance no one had an ace and bet again. Two players fold, leaving you and one opponent.

The turn brings a 7 and you bet again, hoping to charge your opponent for chasing a draw and to try and prevent a medium pair from spiking two pair.

Your

opponent calls your turn bet and a 5 comes on the river. This puts you in a tight spot.

You have been playing aggressively, so do you fire a third barrel on the river?

If your

answer is "no", go and get a cookie and move to the front of the class.

Against a

calling station you can bet away as they will call with all sorts of hands and you are

likely to have them beat. 0 But your opponent is a standard player and if they were on a straight draw there's a very good chance 0 they just made it. If they have an ace, there's no way they're going to fold. There is a slim 0 chance they're holding T-9 and that you have missed a value bet on the river. However, as a rule of 0 thumb, don't bet on the river unless you can:

get better hands to fold (no way on this board); or get 0 worse hands to call

If you now bet and they check-raise, you will almost certainly have to lay your hand down. 0 Take the free showdown and see if you win. There is a good chance you do not have the best 0 hand here, so caution is the key.

Example Hand 3

You

are sat on the button and look down at A-K. One 0 player has limped in, and you raise. The big blind and the limper both call, and the flop comes K-8-3.

The 0 big blind checks,

but the limper now bets into you. Neither player has shown any signs of being maniacs or 0 calling stations. So what do you do? Do you raise?

Once again, the answer is

“no”.

Raising this flop is not necessarily 0 good. While it is likely that you have the best hand at this stage, (barring your opponent holding a set 0 or a hand like K-8, but both are pretty unlikely), you won't earn much profit by raising.

Let's look at it

0 another way. If you raise their flop bet, there are only a few hands they'll call with that don't have 0 you beat. They are more likely to check-raise the flop with something like K-T and would normally just call a 0 bet if they were holding something like 9-8. So if you raise and they fold you have let them get 0 away without making a mistake.

Making

a further bet on the turn is a worse mistake for them than folding to 0 a raise on the flop. Give them the chance to make that mistake. If they have nothing then you don't 0 lose all that much by not raising this flop anyway.

Thus the correct play would be to

just call, giving the 0 big blind a chance to make a more expensive mistake. You can then trap them on the turn with a 0 raise.

What you should recognize in this hand is that

there are no profitable draws available on the board, and your 0 hand is not very vulnerable which makes raising less profitable. However, when holding a hand like 9-9, on an 8-5-2 0 board, you should definitely raise because almost the entire deck consists of scare cards for you. You must learn to 0 analyze the flop texture and see these differences to time your aggression correctly.
