# Though he hoped to plot a path out of chaos, Macron's errors prolong a political crisis in France

Despite having made several appearances during the Olympics, Emmanuel Macron stepped back from the public eye for a large part of his vacation in the south of France during the Games. Since then, having called for a political truce while Paris hosted a spectacular sporting competition, the president hoped to chart a path to exit the self-inflicted crisis created by his decision to call for early elections in mid-summer.

Nothing happened. The Olympic athletes have long since departed, and the traditional *rentrée* of September is approaching. But no new government is in the works - the longest hiatus since immediately after the second world war - and the bitterness remains. This week, Mr. Macron used his presidential power to dismiss any candidate for prime minister proposed by the New Popular Front (NFP), the left-wing alliance that narrowly won the July election.

This was the final error in a tragicomic sequence of mistakes. No parliamentary majority in the Assembly, and a minority government from the NFP would have been a difficult job to survive for a long time. But it would have been a more democratically clean result. Instead, it seems that the president hopes to build a complacent coalition leaning to the right; and that, above all, he will leave his unpopular reforms intact.

This will not be an easy task. Macron's presidency is now gravely compromised. Humiliated by Marine Le Pen in the June European elections, he had hoped to restore his authority by surprising the "front republican" by reuniting the extreme right. This strategy of rehabilitation was defeated by the unity and success of the left. For ambitious conservatives, the prospect of linking their fortunes to a lame duck is still not tempting.

But it is not just about the president and his wishes, or at least it should not be. With a combination of tactical subtlety, audacity and technocratic brilliance, Mr. Macron divided and governed French politics since 2017. But, indulging his characteristic desire to remain completely in control of events, even after losing, he is now acting against the best interests of the country he leads.

The loss of confidence in politics contributed to the rise of the extreme right across Europe, just as in France. In the face of this scenario, refusing to give the winners a chance at the election is at least a chance to forge a consensus - a prudent and far-sighted move. Mr. Macron justified his posture by equating the far right with the party France Unbowed of Jean-Luc Mélenchon (LFI) and the Rassemblement National of Ms Le Pen. But, after repeatedly depending on a broad front republican coalition, including the LFI, to keep Ms Le Pen out of power, this is clearly dishonest.

For now, France is in limbo. Ms. Le Pen - whose eyes were always on the prize of the 2027 presidential election - can afford the luxury of waiting while the conventional political process unfolds. The prospect of government remains remote. The interim prime minister of Macron, Gabriel Attal, is currently working on a provisional budget for the autumn, which he admits could be overturned by his successor. His hubris, once again, led the president to this situation. A new humility in French politics will be necessary to get France out of this.
