Researches in various parts of the world are being conducted to understand the factors that interfere in the international success of Elite Sports (ES).

In this context, the Information Management (IM) becomes strategic so that the sports organizations can take advantage of the data and the processes that involve the success in sport management.

However, little was developed to establish information management models that continuously monitor the Brazilian ES.

The objective of this study, therefore, is to construct a model for the management of ES information in Brazil.

Through a combination of methods, the study consisted of four phases: (1) survey and analysis of methods to systematize of sport information - to identify the fundamental elements for sports success and to review the methods to systematize information of the ES; (2) pilot study - to develop the method of collecting, cataloging and systematizing ES information in Brazil; (3) construction of the ES information management model using an entity-relationship model (ERM) for computerized management of sports data; (4) validation of the management model, through the judgment of an experts committee.

The results revealed that in 29 nations studies have been developed to systematize sport information and to know the elements that interfere in the success of the ES.

The study of the scope of these elements resulted in the selection of ten dimensions for collecting and cataloging Brazilian ES information in a MySQL Database (DB), modeled with the objective of allowing the articulation between the dimensions The elimination of redundancies and the construction of the ERM, the standardization and categorization of the terms allowed the construction of an information management model of the ES that allows continuous updating dimensions and information mapped, composed of eight dimensions: Financial Resources; Sports Infrastructure; Sports Materials; Entities and Governance; Athletes and Sport Professionals; Events and Sport Results; Science and Technology; Legislation.

The model uses the principles of Business Intelligence (BI) and a database that can be continuously adapted to different factors, contexts, and sports.

It is a digital repository of information composed of 75 tables, divided into nine sets that are articulated through 185 relationships, allowing to produce analyzes, reports and indicators of intra or interdimensional form and uni or multisport.

This model allows information crossing and presentation of simultaneous responses of athletes,

entities, sports, their evidence and data that involve financing, infrastructure, and other dimensions.

It was concluded that this study innovates when using the success factors to establish a computerized information management model of the ES, which can be implemented in a country or an entity.

By inserting business intelligence into sports management, this work provides the most important information for decision-making by managers, can qualify the policies and contribute to efficient communication between different sports entities....

Aileen Cannon: a Florida judge under fire for handling of Trump's classified document case

Aileen Cannon, a Florida judge, ha recibido críticas por su manejo de los cargos de documentos clasificados contra Donald Trump. Ignoró el consejo de colegas más seniors al aceptar el caso y, en cambio, ha emitido una serie de decisiones polémicas que han retrasado el juicio.

Consejo rechazado y decisiones criticadas

Dos jueces de la Florida instaron a Cannon a renunciar al caso cuando fue asignado aleatoriamente en junio pasado, debido a preocupaciones sobre su posible parcialidad a favor de Trump. Sin embargo, ella rechazó el consejo y se quedó con el caso, que involucra al ex presidente y los cargos presentados por el fiscal especial Jack Smith.

Desde entonces, Cannon ha emitido varias decisiones que han retrasado el juicio, coincidiendo con la estrategia legal de Trump de mantener el caso en suspenso hasta después de las elecciones presidenciales de noviembre. Sus decisiones han sido criticadas por Ty Cobb, ex asesor jurídico de la Casa Blanca de Trump, quien las calificó de "peligrosas e incendiarias".

Especificaciones del caso

Asunto	Descripción
Intervención en nombre de Trump	Cannon intervino a favor de Trump después de que éste presentara una demanda reclamando que los documentos incautados eran su propiedad personal.

Nombramiento de un especial master
Decisión revocada

Nombró a un especial master para revisar los documentos antes de que los fiscales pudieran verlos.

La decisión de Cannon fue revocada por el 11º Tribunal de Apelaciones en Atlanta, que criticó su fallo y afirmó que no tenía autoridad para prohibir a los investigadores ver los documentos.

Repercusiones y consecuencias

La negativa de Cannon a renunciar al caso ha generado un gasto adicional en la construcción de una instalación segura para almacenar los documentos en el tribunal donde preside, ubicado a unas dos horas de distancia de Miami.
