About CS:GO Roulette and the best Sites to play on

CS:GO Roulette was the second game mode that CS:GO Gambling Sites started offering after CS:GO Jackpot. Compared to real Roulette, CS:GO Roulette is less complicated. You can't bet on individual numbers, you can only bet on Red, Black, or Green. Furthermore, the green Zero doesn't pay out your bet x36 as it would usually, it only pays out x14. Therefore, the game is really easy to understand but has a house edge of around 5%. Unlike games like Coinflip and Jackpot, Roulette is played against the site and not against other players. This means that you can win huge amounts of money but you can also lose a lot more. Gambling is always risky, you have to be at least 18 years old to gamble in most countries. In some countries CS:GO Roulette and CS:GO Gambling is prohibited, for example the United States don't allow any Online Casinos at all.

CSGOEmpire - the best CS:GO Roulette Website

CSGOEmpire is arguably the

best CS:GO Roulette Site. They operate as an Online Casino, regulated and licensed by the Government of Curacao. As one of the first sites on the market to introduce a provably fair system to their Roulette game, CSGOEmpire has always been one of the largest and most trusted CS:GO Sites out there. Furthermore, they have been online since 2024, they almost always offered CS:GO for withdrawals and they haven't been involved in any big scandals yet. Therefore, we believe that CSGOEmpire is probably the best CS:GO Roulette Site and maybe even the best CS:GO Gambling Site in general.

They

heavily focus on their Roulette game mode, but besides that, they also offer Match Betting and Coinflip. The house edge for Roulette is higher than the house edge on Coinflip, but we think that both are pretty decent. You can calculate the house edge by dividing 7 by 15, which equals 0,466666 and so on. Now you multiply that by 2, which equals around 0,933333 etc. This means that the mathematical house edge of CS:GO Roulette is 6,66% which means that you lose 6,66 coins on average if you bet 100,00 coins. This means that the house edge is more than double the Coinflip house edge, which is only 3%. Remember that, before you choose to play Roulette.

CSGORoll - the

CS:GO Game Site available in the US

For many CS:GO players in the United States, skin

gambling websites like CSGOEmpire and CSGO500 are not available due to local gambling regulations. However, CSGORoll is open for players from the United States and other countries that prohibit online gambling. They are not required to operate under a gaming license, because they don't offer cryptocurrencies or other "real money" withdrawal options. Hence, most countries don't consider CSGORoll to be an "online casino" or a "gambling site", which is why they can legally offer CS:GO Roulette on their website for players all over the world. If you would like to withdraw your coins on CSGORoll, you can choose from a huge variety of cool CS:GO skins in their store.

The

house edge on CSGORoll is the same as on all other CS:GO Roulette Sites, around 6,66%. Besides Roulette, CSGORoll users can also play Crash, Coinflip, Dice and unbox CS:GO Cases.

CS:GO Roulette Strategy

There are many different strategies that players use to

"beat the odds". However, it is mathematically impossible to beat the house. In the long run, you will ALWAYS LOOSE MONEY or CS:GO skins playing Roulette. Therefore, we suggest to gamble for fun only. You should never see gambling as a way to make money.

The Martingale Strategy

The most popular CS:GO Roulette Strategy is called "Martingale". This strategy is based on increasing your bet after every loss. You start by selecting a base bet, let's say 1 coin. Now you bet this coin on Red or Black, let's say you bet on Black. If you win, you keep betting 1 coin. However, if you lose, you double your bet. This means you now bet 2 coins, after losing one. If you win the bet now, you win 2 coins, but you lost 1 coin before which means your total profit is 1 coin. Imagine you lose two bets in a row, now you would have to bet 4 coins. If you win now, you win 4 coins, but you lose 2 + 1 coin before, which means you made only 1 coin profit. You see, where this is going: Your base bet is always your profit at the end.

We know, that this sounds like a very promising Roulette Strategy to you. However, there is one big problem with the Martingale strategy. Because you have to double your bet after every loss, you will reach insane high bets when you have a losing streak.

The only way to combat this is by using a very small base bet, which also means very small profits for every win. Mathematically speaking, there is no way to beat the house with the Martingale strategy. A losing streak is going to come and you are going to lose everything. Furthermore, Martingale is a time-consuming strategy and you don't want to waste huge amounts of time gambling.

What's the best Roulette Strategy for me?

We believe, that playing Roulette and gambling in general shouldn't be about trying to make money. Therefore, we suggest you just play without a strategy and have some fun. Set limits for yourself and never play with money that you can't afford to lose.

Don't try to see gambling as a job. When you don't have fun anymore, stop playing or take a break. Roulette and other casino games can be very addicting, which means that you should always be careful. We can recommend any specific strategy to you, because they are all far from perfect. However, if you still want to try out a strategy, we suggest using the Martingale strategy with a low base bet and a limit of 100 coins. If you lose your coins, don't deposit more, stick to your limit and STOP PLAYING.
