With the growing development of the artificial intelligence (AI) industry, China is now the largest market, followed by the United States.

The number of AI models in the world reached 1.328, with 36% from China and a second major promotion from the state.

The statistics are from a technical document on the global digital economy published by the Chinese Academy of Technology in Information and Communication Global 2024, inauguration of online casino on Wednesday.

Among the nearly 30,000 AI companies in the world in the first quarter of this year, the United States had 34% and China 15%.

Xu Xinchao, general secretary of the municipal government of Beijing, said that the development of generative AI represented by large models and languages is accelerating the transformation of intelligent values.

A digital economy combining the United States, China, Germany and South Korea surpassed the 33 billion US dollar online casino in 2024, an annual increase.

By the end of May, China had built 383 million 5G base stations, representing 60% of the global total, said Xin Guobin, vice-minister of Industry and Technology for information.
