Hold 'em is a popular form of poker in the USA.

Poker is a 3 game which people play with a normal set (or deck) of 52 cards. Poker is a gambling game which involves 3 some luck, but also some skill. In poker, players make bets against each other depending on the value of their 3 poker hand. Bets are usually made with plastic or ceramic discs called chips. Bets may also be made with coins 3 or cash, but chips are more often used because they are easier to handle and count. At the end of 3 the game, players may swap their chips for money. If the players are not playing for real money, the chips 3 are counted at the end of the game to determine the order of winners.

There are many different kinds of poker. 3 In draw poker, each player is dealt five cards. A player can decide to throw away a number of these 3 cards and then take (draw) new cards to replace them.

In stud poker (for example, seven-card stud), some of each player's 3 cards are laid (face-up) on the table so that the other players can see them. In community card poker (for 3 example, Texas hold 'em), players share some of their cards in the center of the table.[1]

The history of poker

is 3 a matter of some debate. The name of the game likely descended from the French poque, which descended from the 3 German pochen ('to knock'), but it is not clear whether the origins of poker itself lie with the games bearing 3 those names. It closely resembles the Persian game of as nas, and may have been taught to French settlers in 3 New Orleans by Persian sailors. It is commonly regarded as sharing ancestry with the Renaissance game of primero and the 3 French brelan. The English game brag (earlier bragg) clearly descended from brelan and incorporated bluffing (though the concept was known 3 in other games by that time). It is quite possible that all of these earlier games influenced the development of 3 poker as it exists now.

English actor Joseph

Crowell reported that the game was played in New Orleans in 1829, with 3 a deck of 20 cards, four players betting on which player's hand was the most valuable. Jonathan H. Green's book, 3 An Exposure of the Arts and Miseries of Gambling (G. B. Zieber,

Philadelphia, 1843), described the spread of the game from there to the rest of the country by Mississippi riverboats, on which gambling was a common pastime.

Soon after

this spread, the full 52-card English deck was used, and the flush was introduced.

During the American Civil War, many additions were made, including draw poker, stud poker (the five-card variant), and the straight. Further American developments followed, such as the wild card (around 1875), lowball and split-pot poker (around 1900), and community card poker games (around 1925). Spread of the game to other countries, particularly in Asia, is often attributed to the U.S. military.

The game and

jargon of poker have become important parts of American culture and English culture.

Such phrases as ace in the hole, beats me, blue chip, call the bluff, cash in, pass the buck, poker face, stack up, up the ante, when the chips are down, wild card, and others are used in everyday conversation even by those unaware of their origins at the poker table.

Modern tournament play became popular in American casinos after the World Series of Poker began in 1970. It was also during that decade that the first serious strategy books appeared, notably *The Theory of Poker* by David Sklansky (ISBN 1880685000), *Super System* by Doyle Brunson (ISBN 1580420818), and *The Book of Tells* by Mike Caro (ISBN 0897461002).

Poker became more popular early in the 21st century, largely due to the introduction of online poker and the invention of the hole-card camera which finally turned the game into a spectator sport. Viewers could now follow the action and drama of the game, and broadcasts of poker tournaments such as the World Series of Poker and the World Poker Tour brought in large television audiences.

Game play [[change](#) | [change source](#)]

Royal Flush in hearts

The game of poker is played in hundreds of variations, but the following overview of game play applies to most of them.

Depending on the game

rules, one or more players may be required to place an initial amount of money into the pot before the cards are dealt. These are called forced bets and come in three forms: antes, blinds, and bring-ins.

Like most card games, the dealer shuffles the deck of cards. The deck is then cut, and the appropriate number of cards are dealt face-down to the players. In a casino a "house" dealer handles the cards for each hand, but a button (any small item used as a marker, also called a buck) is rotated among the players to determine the order of dealing and betting in certain games. In a home game, the right to deal the cards typically rotates among the players clockwise, but a button may still be used.

After the initial deal, the first of what may be several betting rounds begins. Between rounds, the players' hands develop in some way, often by being dealt additional cards or replacing cards previously dealt. During a round of betting, there will always be a current bet amount, which is the total amount of money bet in this round by the player who bet last in this round. To keep better track of this, it is conventional for players to not place their bets directly into the pot (called splashing the pot), but rather place them in front of themselves toward the pot, until the betting round is over. When the round is over, the bets are then gathered into the pot.

After the first betting round is completed (every participating player having called an equal amount), there may be more rounds in which more cards are dealt in various ways, followed by further rounds of betting (into the same central pot). At any

time during the first or subsequent betting rounds, if one player makes a 3 bet and all other players fold, the deal ends immediately, the single remaining player is awarded the pot, no cards are shown, no more rounds are dealt, and the next deal begins. This is what makes it possible to bluff.

At the end of the last betting round, if more than one player remains, there is a showdown in which the 3 players reveal their previously hidden cards and evaluate their hands. The player with the best hand according to the poker 3 variant being played wins the pot.

The following are poker hands, from best to worst:

Straight flush : Five cards of the 3 same suit in sequence (if those five are A, K, Q, J, 10; it is a Royal Flush)

: Five 3 cards of the same suit in sequence (if those

five are A, K, Q, J, 10; it is a) 3 Four of a kind : Four cards of the same rank and any one other card

: Four cards of the 3 same rank and any one other card Full house : Three cards of one rank and two of another

: Three 3 cards of one rank and two of another Flush

: Five cards of the same suit

: Five cards of the 3 same suit Straight : Five cards in sequence (for example, 4, 5, 6, 7, 8)

: Five cards in sequence (for 3 example, 4, 5, 6,

7, 8) Three of a kind: Three cards of the same rank

Three cards of the same 3 rank Two

pair: Two cards of one rank and two cards of another

Two cards of one rank and two

cards 3 of another One pair: Two cards of the same rank

Two cards of the same rank High

card: If no one 3 has a pair, the highest card wins

Poker chips [[change](#) | [change source](#)

]

Poker chips are small discs. They were made 3 by various materials including molded plastic, colored metal molded clays. They are used in table games as play money. Modern 3 poker traces its roots towards the 1800s, and in those days, players used what you could to help keep a 3 tally. Coins, gold dust and nuggets were used until they considered replacing with something which would indicate them. Thus, the 3 casino chips happen to be introduced within the gambling business.

Poker rooms started using casino chips to

simply manage the cash 3 and then collect charges. In those days, casino chips were created of ivory, bone, paper wood. However, the most generally 3 used chips were created of composite clay. One problem made an appearance due to the developing casino chips which was 3 cheating. Some players considered sneaking some chips in their hands. To avoid this, manufacturers created differentiated disks. Consequently, a range 3 of styles was created. With time, other manufacturers could use many other materials for making casino chips, for example, plastic 3 and metal.[2]
