The roulette cylinder was introduced in a primitive form, in the 17th century, by Blaise Pascal, a French physicist, philosopher and inventor, in his quest to create for a perpetual motion machine. The game of roulette as we know it today started being played a century later, around 1760, in France.

For the untrained eye, there is no difference between the different types of roulette wheels, but at a closer look, the differences become self-evident. One of the first decisions that roulette players need to make is whether to spin a European or American roulette, as these are the two main types of roulette wheels. One big difference between them is that the American version has two zeroes on the cylinder, which leads to a bigger advantage for the casino. This should have a deterring effect on prospective players, but there are still plenty who choose this type of wheel, mainly because in some countries like the USA there are no alternatives, as the vast majority of casinos houses only double zero wheels. Interestingly the first roulette introduced in France had two zeros, but that changed when the German casinos wanted to compete and introduced the single zero roulette to attract more clients.

Please note that except the different types of wheels there are also different types of tables and rules variations.

AMERICAN ROULETTE

There are a total of 38 pockets on the American roulette wheel, ranging from 0 to 36, plus the additional 00 number. 18 of these pockets are red, the other 18 are black while the two slots featuring 0 and 00 are green. Speaking of these slots, they are placed at the opposite side of the cylinder, just like consecutive numbers while overall there are no adjacent numbers of the same color. This is how the counterclockwise sequence of numbers looks like on the American roulette wheel: 0, 2, 14, 35, 23, 4, 16, 33, 21, 6, 18, 31, 19, 8, 12, 29, 25, 10, 27, 00, 1, 13, 36, 24, 3, 15, 34, 22, 5, 17, 32, 20, 7, 11, 30, 26, 9, 28.

If you happen to be a novice and like this game, you shouldn't be discouraged from its bells and whistles. The big betting zone in the middle will work just fine. Use the rest of the features at your own pace once you've nailed down the basics.

To win in European Roulette Pro, you need to guess in which pocket the ball is going to land. Make your prediction by selecting a playing chip from the bottom-right corner and clicking on the layout in the middle. Hover your mouse over the zone, and you'll see what your money will cover, and the potential pay-off. Betting limits may differ, but you can see min/max values for the specific version on the black card in the top right.

Once you've clicked on the table, four big buttons will light up in the middle. If you've made a mistake, use the "Undo" and "Clear all" icons to start anew. "Spin" will start the game round, so don't press it until you're ready. "Double" will multiply your current bet by 2.

There's a small European Roulette Pro hack you can use to skip the "dead time" during which the ball rotates. Just press "Stop" or locate the lightning bolt icon at the bottom-left to enable Fast Play. Other buttons in this area will display the full game rules and let you mute/unmute different sounds.
