Monsters Slot Overview

Lordi Reel Monsters is a new casino slot from Play'n GO that brings us another spectacular heavy metal band gaming experience. This game provider's penchant for rock has hardly gone unnoticed, where we've taken part of slots like Hammerfall and ZZ Top Roadside Riches, among others. This time it's time for the Finnish heavy metal band Lordi to enter the stage. This band was founded back in 1992, where they are associated with melodic metal music and the wearing of monster costumes. In 2002, their career really blossomed, when the song "Would You Love a Monsterman?" was created, followed by the song "Hard Rock Hallelujah" a few years later, which managed to win the whole Eurovision song contest and its melodic tunes made most people sit and swing to the beat. They are a fantastically exciting band, and it will therefore be extremely interesting to dive into this slot and find out what you can expect to see during the spins.

Selection - Free Spins feature

Wild Symbol

The game's wild symbol

helps to enable more winning combinations by substituting for other symbols.

Cascade

When you spin the reels and create a winning cluster, you activate the cascade feature. Then all the symbols that were part of the winning combination will disappear from the reels and new symbols will fall down to cover the empty positions. This continues as long as new wins are created.

Monster Charger

When you create a win,

the symbols that were part of the winning combination will be collected into the monster charger. This meter will fill up during the current spin, where it will be reset on the next spin that is made. There are two different levels that you can successfully charge up this meter to, where we have Monster and Free Spins.

Monster

If

you have 15 or more symbols in the monster charger, then the monster feature is activated. Then a random monster feature will be activated, where these are and do the following:

Mr.Lordi = This places out 5 to 8 wild symbols on the reels.

Hella = This

will protect 1 to 2 symbol types and wilds, where the remaining symbols are removed, which then activates the cascade feature.

Free

If you have filled up the monster charger with 40 symbols, then the free spins feature is activated. You will then take part in 1 of 2 different free spins features

which are either Reel Monsters or Better Hate Than Never.

This multiplier starts at 1X and will then increase by 1X with each cascade that occurs. During this feature you are guaranteed to activate 2 monster features.

Better Hate Than Never - Free Spins feature

Better Hate Than Never

If you

activate this bonus game, you will be awarded with a wild collector. You will receive 1 free spin and here the winning wilds will be collected. You are guaranteed 3 monster features and after these are completed, the wilds will be placed out on the reels again. There will be 5 to 10 wilds at a time placed and this will continue as long as you have wilds left to use. During this phase, the wilds will not be collected.

Reel Monsters Slot Conclusion

Slots that have cluster pays and rock themes, is a concept that we have taken part of in numerous previous occasions from this game provider. Where its adrenaline-filled features certainly fit well with this fast-paced style of music. It's a slot where you quickly get into a good mood, where sweet tunes from this band constantly are played during the spins and it feels like you've ended up in a natural habitat of this monster-clad band. By creating winning clusters, you will activate the cascade feature which could result in a spin being very drawn out, as new symbols constantly fall down to cover the empty positions. As wins are created, these will be collected into a monster charger, and it is this charger that can result in some really explosive wins. By collecting 15 or more symbols, we are introduced to a random feature from one of the five band members, where you can get anything from wild symbols deployed or change symbol types. All of these monster features have delightful qualities to contribute to the bigger wins and help the player to successfully collect 40 symbols which is what one constantly strives for.

Once you have collected 40

symbols, you will be able to choose between two different bonus games. One is the cascade multiplier, which just like its name, consists of a win multiplier that increases as more cascades occur and also guarantees 2 monster features. The other bonus game to choose from is the wild collector, who guarantees 3 monster features, with all wild symbols that land being collected. It's certainly a matter of taste as to which of these to choose and they both certainly can provide some juicy wins. It's a slot that has a classic mix of RTP sizes from this game provider, with its RTP of 96.20% by default being within a good size. Unlike many other rock themed slots from Play'n GO, this one has a much lower max win size, and this is because a milder approach of volatility has been chosen. Despite the medium volatility, however, this is a slot that can provide some real thrilling moments, with its music being a big contributing factor in creating that atmosphere. A captivating design is used, and fans of heavy metal will really appreciate this slot, as it is largely based on its theme.

There are many reminiscent features that we have taken part of before including Hammerfall, but this will be a lovely slot to play for a change and its medium volatility will certainly be appreciated by the less risk averse players.

Lordi Reel

Monsters is a slot from Play'n GO where, along with this Finnish heavy metal band, we get to enjoy a proper show of cascades, wilds and monster features.

Falta de vacinas contra a mpox na República Democrática do Congo

Não há vacinas disponíveis para a mpox na República Democrática do Congo, epicentro de uma emergência global de saúde declarada há uma semana, apesar de o país ter solicitado as injeções há dois anos e os fabricantes afirmarem ter suprimentos.

"O que mais precisamos agora são as vacinas", disse o Dr. Samuel-Roger Kamba, ministro da saúde do Congo.

Mas onde estão as injeções? Elas estão presas em um processo burocrático de regulação de drogas complexo na Organização Mundial da Saúde (OMS).
