Online roulette is an exciting game of chance that offers far more possibilities than in a real casino. With a free online roulette game, you can learn the rules of the game and explore betting strategies without any risk. You don't need to download an app or sign up to get started. Just click on your favourite NetEnt roulette game on this page, place your bets and wait to see where the ball lands in the wheel. There are also many more tips on how to play roulette online in the following guide!

How to start playing

online NetEnt roulette for free

Roulette rules are very simple and everyone can learn them. A small ball is thrown into the wheel, and it stops in one of the pockets. If the number matches the one on the bet zone you placed your stake on, you win. Since you don't invest any money in free roulette, you can learn the exact betting rules, strategies, and variations without any risk of losing money.

Popular strategies

Ever

since roulette existed, people have tried to use strategies or systems to increase their winning odds. However, Roulette is purely a game of chance, so these attempts are not successful. However, you can look at the whole matter from a different angle. By using intelligent betting strategies, you can try to reduce your losses, and this is exactly what the best-known roulette strategies deal with. And this is exactly why it is perfect to use a free roulette simulator. You can discover all the strategies, experiment with them at no risk, and then use them to play real money roulette at reputable online casinos. Here are the best online roulette systems and how they work.

Martingale System

The Martingale strategy is probably the best-known roulette strategy. You just place even money bets and try to make up for the loss by doubling the bet if you lose. If you win, you keep the payout and start again with the original bet. The drawback of this roulette strategy, however, is that due to limited funds and

table limits, you cannot double down at will on losses. Even if you place a relatively small bet, you will quickly reach high numbers in a series of losses and can still only take the original bet amount as a profit.

D'Alembert System

D'Alembert roulette

strategy is a system that is particularly beginner-friendly. Here you choose a bet that you either progress with or return with. If you win outright, you collect the payout. If you lose, you increase the stake by a certain amount, and if you win, you decrease it by that amount. You follow this system until you get back to the single bet and win right away. Then you can start again from the beginning.

The best way to try out the

D'Alembert strategy is by playing free online roulette. With the simulator, you have all the time you need to test whether this system is suitable for you. Even though there is no guarantee, the risk is lower with this method because the progression is not as high as with Martingale.

Fibonacci System

The Fibonacci method is derived from a scientific sequence of numbers used to observe the reproduction rate of mice. However, it can also be used for roulette games online. The basic principle of Fibonacci is to always add the last two numbers. For online roulette, this means that you lose less with this betting strategy, but in the event of a losing streak, it takes longer to make up for it.

The first time you play, you bet a specific stake. With a win, the roulette player starts again from the beginning. If you lose, you bet that amount again the next time (1+0). The next time you lose, you bet twice the stake (1+1) and after the third loss, you bet five times the stake (2+3), then eight times the stake and so on. If you write down the Fibonacci number sequence (1-1-2-3-5-8-13-21 etc.), it's easy to follow it. For winnings, it is the other way around. Since this strategy is not so easy, you should play free games and practice until you have mastered this system.

Odds

and bet zones in free roulette and real money games

When playing free roulette online,

you can understand the different types of roulette bets relatively quickly. They are divided into inside and outside bets, depending on where the chips are placed on the table.

Inside bets

These bets are placed directly on the number field. Depending on their likelihood of winning, there is a different payout ratio in each case. Inside bets win less often than outside bets, but the payout is higher if they win. Inside bets involve betting on either individual numbers or small-number groups.

Straight up

bet or classic bet is when you place the stake on a single number (including zero/double zero). Winnings are paid at 35:1.

In a split bet, you place your bet on two adjacent numbers. To do this, you move the chip to the line that connects these two numbers. If you win, you receive a 17:1 payout.

In a street bet, you place a bet on three numbers. To do so, you place a chip on the side line that connects the number fields. If one of them wins, the payout is 11:1.

With corner or four-way bets, you bet on four adjacent numbers. To do so, you put the stake on the cross that connects the corresponding number fields. This type of bet wins 8:1.

A six-line bet is also called

Transversal Simple. Here, you bet on two adjacent rows of 3 numbers each. You place the stake on the side of the number field on the cross between the two rows. If you win, you receive a 5:1 payout.

Outside bets

Outside bets are placed outside the number field. They have higher winning odds, but the payout is therefore lower. There are 5 different types of these bets and in the event of a win, they are awarded as follows:

Column bets can be made for 12 numbers at the bottom of the roulette grid. The payout is 2:1.

Dozen bets payout at a 2:1 ratio. You can bet on groups of twelve (1-12, 13-24, 25-36).

Red/black bets cover all number fields (except zero and double zero) on the roulette wheel. Since the odds of winning are relatively high here, the payout ratio in case of a win is 1:1.

Even/odd bets can be made on all numbers except zero and double zero. If you win, the payout is 1:1.

High/low bets cover the 18 lowest (1-18)

and highest numbers (19-36) respectively. Again, the payout ratio is 1:1.

NetEnt

Um ataque cibernético contra um empreiteiro do Serviço Nacional de Saúde da Inglaterra. Vários hospitais de Londres já forçaram vários grandes centros hospitalares a cancelar operações, exames e consultas ao sangue para enviar pacientes.

O Hospital King's College, o Guy' e St Thomas foram todos afetados? assim como numerosos provedores de cuidados primários na capital do Reino Unido - disse um porta-voz da National Health Service (NHS) nesta terça.

Os hospitais e provedores afetados são todos parceiros da Synnovis, uma empresa que presta serviços de laboratório para o NHS. A companhia disse na terça-feira ter sido atingida por um ataque ransomware (que afetou todo seu sistema informático) "resultando roulette como jogar interrupções a muitos dos nossos Serviços Patológicos".

Entre os serviços mais interrompidos estavam aqueles que envolviam exames de sangue ou transfusões.

Oliver Dowson, 70 anos de idade foi preparado para uma operação a partir das 6 da manhã do dia 3 junho no hospital Royal Brompton – um centro especializado roulette como jogar coração e pulmão administrado por Guy's and St Thomas' - mas contou-se ao cirurgião que não iria adiante.

"A equipe da ala não parecia saber o que tinha acontecido, apenas muitos pacientes estavam sendo instruídos para irem embora e esperar por uma nova data", disse ele à agência.

Vanessa Welham, de Streatham no sudoeste da Londres disse à AP que o exame sanguíneo do marido dela na clínica Gracefield Gardens foi cancelado segunda-feira e ele ficou sabendo para a polícia local não estava fazendo reservas por um "período indeterminado". tempo."

O NHS disse que o ataque estava tendo "um impacto significativo na prestação de serviços" roulette como jogar hospitais, mas acrescentou ainda a disponibilidade dos cuidados.

O porta-voz do NHS pediu desculpas "pelo inconveniente que isso está causando aos pacientes e suas famílias".

"Estamos trabalhando urgentemente para entender completamente o impacto do incidente com apoio da segurança cibernética nacional e nossa equipe de operações", disse a porta-voz.

Os ataques de ransomware geralmente envolvem hackers usando software malicioso ou malware para bloquear o acesso a um servidor até que seja pago. Ataques ao sistema médico no Reino Unido são relativamente raros, dizem especialistas

Ciaran Martin, ex-chefe do Centro Nacional de Segurança Cibernética (NSC) da Grã Bretanha disse que os serviços britânicos sofreram "comparativamente menos interrupções" roulette como jogar relação aos EUA por ataques com ransomware.

"Isso é roulette como jogar parte porque muito da saúde britânica está no governo, e o Governo nunca paga", disse Martin.

"Mas este é um ataque a uma fornecedora privada do NHS. E mostra que os horrores da interrupção dos crimes cibernéticos na saúde também podem atingir essas costas."

"Os detalhes ainda estão emergindo, mas isso parece um incidente muito sério com consequências potenciais para o atendimento ao paciente", acrescentou Martin.

Mark Dollar, CEO da Synnovis disse que a empresa estava "incrivelmente arrependida pelo inconveniente e chateado com o fato de isso estar causando aos pacientes? usuários do serviço ou qualquer outra pessoa afetada. Estamos fazendo nosso melhor para minimizar seu impacto - vamos manter contato direto dos serviços locais NHS (Serviço Nacional Sanitário)"
